EXPERIENCE

D&V Group, Web Designer

Feb - May 2018, Toronto, ON

Designed, developed and launched the company's website. Collaborated with stakeholders to get their unique vision. Established the brand presence on the web by creating a unique design style and conducting SEO.

Freelance, Designer / Developer

Aug 2018 - Present, Toronto, ON

Worked on personal mobile app design projects and websites for clients. Designed an intuitive data-driven UI for news aggregator web app.

EDUCATION

George Brown College, Computer Programmer Analyst

2014 - 2018, Toronto, ON

Programming – System Design – Front-end Development – SDLC – Collaborative Designing

BrainStation, User Experience Design

Jul - Sep 2018, Toronto, ON

Gained extensive knowledge in mobile app design while creating a concept for the transit app for Toronto. Interviewed four people to create a user persona. Designed user flows and created high-fidelity wireframes in Sketch, conducted testing to eliminate usability problems.

CERTIFICATIONS

Shaw Academy, Web Design & Adobe Photoshop

Coursera, User Interface Design for IOS

PROJECTS

Novo, Android / IOS App - Collaborative

2018

Targeted the initial design toward Android after conducting research into competitor applications. Successfully created an interactive prototype and organized all components, forwarding them to the developer.

Green Vision, Android App - Hackathon

2018

Employed an exceptional work ethic and outstanding problem-solving abilities to design an app in 36 hours. Worked with two developers and used InVision to implement the application after designing the UI with Sketch.
